DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4,8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Baum et al. U.S. patent no. 3,652,275.

In Example 2, Table 2 an article comprising an imaging composition is taught comprising a sensitizer of formula (I) in applicant's claim 3 (ketone IV), a dilute (acetone) as in claim 2. The composition undergoes a color change (col 3, lines 9-20) and is polymerized upon application of an energy of 5 mW. Example 2 also teaches the method of claim 8 and the image is a pattern as in claim 9 because the patents states in col. 17, lines 52-53, that polymerization was determined by dusting with pigments that do not adhere to the polymerized areas, thus there are polymerized areas and non-polymerized area which form an image pattern.

Claim Objections

3. Claim 9 is objected to because of the following informalities: It is dependent upon itself. Appropriate correction is required.

Allowable Subject Matter

4. Claims 5-7 are allowed.

5. The following is an examiner's statement of reasons for allowance: The prior art does not teach an article comprising a substrate having an imaging composition on a first side of the substrate and an adhesive on a second side of the substrate wherein the imaging composition comprises a sensitizer to affect a color or shade change upon application of energy at an intensity of 5 mW or less.
